

Vercel Deployment Guide - Quick Start

Deploy in 3 Steps

Step 1: Get Your Vercel Token

1. Go to: <https://vercel.com/account/tokens>
2. Click "Create Token"
3. Name it: `kreative-deploy`
4. Select Scope: **Full Account**
5. Click "Create"
6. **Copy the token** (you won't see it again!)

Step 2: Deploy to Vercel

```
cd /home/ubuntu/creative_web_agency/nextjs_space

# Option A: Set token as environment variable
export VERCEL_TOKEN="your_token_here"
./node_modules/.bin/vercel --prod --confirm

# Option B: Use token directly in command
./node_modules/.bin/vercel --token "your_token_here" --prod --confirm
```

Step 3: Configure Environment Variables

After deployment, go to your Vercel dashboard:

1. Go to: **Project** → **Settings** → **Environment Variables**
2. Add all variables from your `.env` file
3. Select **Production**, **Preview**, and **Development** for each
4. Click **Save**
5. **Redeploy** from the Deployments tab

Required Environment Variables

Copy these from your current `.env` file to Vercel:

```
# Database (CRITICAL)
DATABASE_URL=postgresql://...

# Auth (CRITICAL)
NEXTAUTH_URL=https://www.kreativeaiagency.com
NEXTAUTH_SECRET=your-secret-here

# Stripe (for payments)
STRIPE_PUBLIC_KEY=pk_test_...
STRIPE_SECRET_KEY=sk_test_...
STRIPE_WEBHOOK_SECRET=whsec_...

# Email (Resend)
RESEND_API_KEY=re_...

# Phone (OpenPhone)
OPENPHONE_API_KEY=...
OPENPHONE_PHONE_ID=...

# AI (OpenAI)
OPENAI_API_KEY=sk-...
```

DNS Configuration (After Successful Deployment)

In Vercel Dashboard

1. Go to **Project → Settings → Domains**
2. Click **Add Domain**
3. Add: `kreativeaiagency.com` (mark as PRIMARY)
4. Add: `www.kreativeaiagency.com`

In GoDaddy DNS Manager

1. Go to: <https://dcc.godaddy.com/manage/kreativeaiagency.com/dns>
2. Update these records:

Type	Name	Value	TTL
A	@	76.76.21.21	600
CNAME	www	cname.vercel-dns.com	1 Hour

1. **Wait 15-30 minutes** for DNS to propagate
2. Verify at: <https://dnschecker.org/?domain=kreativeaiagency.com>

Post-Deployment Checklist

Test these URLs after DNS propagates:

- [] <https://kreativeaiagency.com>

- [] <https://kreativeaiagency.com/about>
- [] <https://kreativeaiagency.com/services>
- [] <https://kreativeaiagency.com/pricing>
- [] <https://kreativeaiagency.com/get-started>
- [] <https://kreativeaiagency.com/quote>
- [] <https://kreativeaiagency.com/admin/login>

Test critical functionality:

- [] Submit a quote form
- [] Login to admin dashboard
- [] Start a test Stripe checkout
- [] Send a test SMS (verify webhook works)

Troubleshooting

Build fails

```
# Regenerate Prisma client locally
yarn prisma generate

# Try build again
yarn build
```

Environment variables not working

1. Check they're added in Vercel dashboard
2. Ensure "Production" is selected
3. **Redeploy** after adding variables

API routes return 404

- Verify `vercel.json` exists with `{"framework": "nextjs"}`
- Check Build Output Directory is blank

Database connection fails

- Verify `DATABASE_URL` in Vercel
- Check database allows connections from Vercel
- Test connection string format

Need Help?

Vercel Documentation: <https://vercel.com/docs>

Support: <https://vercel.com/support>

Project Status:  Build passed, ready to deploy with token

Quick Reference: See `VERCEL_MIGRATION_CHECKLIST.md` for detailed testing guide
